## IMPROVEMENT ON THE BROUGHER \$2.40 WITH RICH RUBY SILVER SHOWING

TRUTH IS ADMITTED  
BUT VALUE OF STRIKE  
NOT GIVEN OFFICIALLY

There isn't a chance of the boom getting away from the center of Tonopah. It is here and the crop of gold is sticking out all over Main street. There has been a time of excitement around the Bialto ever since the development of stock trading but it was surpassed this morning when a man arrived in the hotel district looking for his broker, the held Brougher Divide from 15c and had given an order the previous evening to sell. Then he went to his cabin out on the Divide with the aid of a friendly flyver and was about settling down to a just and contented sleep when a knock came to his door and a miner inquired about his Brougher. "Just gave an order to sell," replied the budding Croesus.

"The hell you did," was all the miner could say. "Why man that stock will go to five dollars before this. You've got high-grade in the new drift."

That settled it. The owner of the big block of Brougher plunged into his digging tools and proceeded to hit the trail for town. The distance of six miles did not phase him. He was too excited to think of calling on some of the boys backing on the Divide to yank out their flippers but he just liked the whole distance and he reached town and then pulled his broker out of bed to countermand the selling order. His celerity saved the stock and tomorrow he expects to be \$20,000 or \$30,000 richer than if he had not acted as he did.

The market opened with a jaundiced aspect imparted by New York bears who hammered everything in sight, beginning with Gold Zone, which seemed scheduled for a break (Continued on page four)

CAPT. PROSKEY TAKES  
OVER TWO GROUPS

Capt. Alex. S. Proskey, who has been spending several days here looking over promising ground, left this morning with the deeds for two groups of claims which he secured for associates in Reno and New York. The first of these embrace only a claim and a half but its location with reference to surrounding property is considered very attractive since it is on the trend of the big fault. The owners were McVeigh and Herald who have held the ground for some time. The title will be vested in the Argentine Mining company which was incorporated yesterday by wire. While Captain Proskey has been engaged in mine development and the active production of ore in Nevada for the past thirteen years and was identified with Rawhide before the inception of the boom he says he does not rank as a promoter and this is the first time he ever placed a property. The claims adjoin the Mohawk Divide and Divide Con.

In addition to this group the captain took over the Magnitude group, consisting of three claims on the north strike of the vein which was located 12 years ago and has a shaft at 30 feet down. A contract will be let for sinking a shaft on the Argente ground.

STIRRING SCENES ON  
STREETS WHILE CITY  
SUPPOSED TO SLEEP

There was a real oldtime stampede last night out of Tonopah in an easterly direction when "sawdust" were shown around Main street glistening with free gold that panned freely, giving a string of colors from a very small piece of rock. It did not take much time for the news to be noised around and in a few minutes old desert rats could be seen sneaking off in their flyvers until the alarm spread and then the rush became general. At midnight it was reported that 200 men were busy planting monuments at the scene of the strike which is a general way

BIZARRE GROUP  
GOES TO JOSEPH

The Bizarre group, known to former days as the Kankakee mine was taken over yesterday by a syndicate represented by J. L. Jospen, president of the Grimes Divide company. In many respects this property appeals to the better class of mining engineers owing to the fact that it has a shaft down 100 feet and was made a special object of study by Professor Spurr, of the U. S. geological survey, when he made his report on the Divide district in 1903. The shaft carries values of from \$8 to \$60. The owners were Grimes and Hanson, both of whom have had it a long time during which they carefully protected their rights from lapsing.

They located four claims as the Roosevelt group and another partner named Jack Stewart ended them with another bunch of claims from which still better looking rock was taken. Reports from the first contingent began to come in long after midnight until at 3 o'clock this morning another bunch of locators seized any machine they could find standing in the streets without waiting to ask consent of the owners, and hurried off to the distant hills. Samples were brought in this morning and left with the assayers but, at last accounts the samples had not been run.
